and the winter price of  
imported goods will be determined by the  
amount of the taxes collected.  
With regard to the foreign and domestic  
trade, there are two main classes of goods  
which enter into the market, viz., those  
which are produced at home and those  
which are imported. The former are  
produced in the country and are  
exported to other countries. The  
latter are produced in other countries and  
imported into the country. The

latter are produced in other countries and  
imported into the country.
