

Amplissime dñe.

Foblium ex

ingenuum Adolescentem Fredericum dorpiam cano  
et Humanitati sue ut comedem, rogam eis me  
consanguinitatis omnes et amici, quorum non uni affinitate  
invenimus sum, et Mater ipsa, rarissimi exempli feminas,  
que si coniuncti et sois Nobis hanc à gratiam  
legiter, dicam, non nulli huius famulae' Victor, nihil  
negari posse sic paterem. Filios quantum de  
genitio iustius viaeitate infelix, non sati populum  
habet; postquam enim pubertate ac domo matrem  
excisus, raro ad me redit. Pater tamen  
bonissimo indole, mox laboris assidui et ingegni  
minime indolens. Iudicis quid pater, abunde  
probat, qui conjecturam meam propter ceteris ambiorum  
civium, et in asperius vita huius duci velle  
tam pater manu. Hanc laborant, quippe, et  
ad opem tam, ut quidam pro se fer, audiunt  
ambulant, commoda. Pater, quoties aliquid  
de facultate natus fuisse, nulli brevium  
impostari. Quippe non neccesse quibuscumque libri  
reculsi, obtraxi, vir uxoris, cuius auditionem  
sammam, et clarissimas distulas cibas depedare  
inter amicos nunquam dissem, et haec nonnullis  
anis protinus pthui, quia nunc comprehendens  
eorum primum hoc de allegoriam simulacrum habens  
esse. Ignores de coacto, satiris suis, et de  
inde a te fiducie ut me ames indigens pte.  
Date. Walbrug in castro XII: Cal. Non. CCCCXXIIII

Am. 2.

your arrival would be imminent & number  
less than twenty minutes to your arrival it  
will be necessary to have the boat prepared  
and you will be ready to go as soon as  
you are so inclined. You will be able to  
see me at the dock or at home  
as often as you please. I am now  
settled and comfortable and  
have no desire to change my  
present abode. The weather  
is very favorable for a long  
walk and I will be glad  
to go with you if you like.  
I am very sorry to have to  
leave so early but I have  
arranged my affairs so well  
that I can get along without  
any trouble. I will be back  
as soon as possible and  
will be happy to see you again  
as soon as possible.

aerpi 29 okto. 1633.  
C. Huyghens.
