in the same manner as the other
parts of the body. The skin
is very thin and delicate, so
that it is easily torn and
bruised. The hair is short and
thin, and the skin is covered
with small pores. The skin
is very sensitive to touch,
and it is easily irritated by
cold or heat. The skin is
also sensitive to pressure, and
it is easily bruised. The skin
is also sensitive to friction,
and it is easily rubbed off.
The skin is also sensitive to
chemicals, and it is easily
damaged by them. The skin
is also sensitive to light, and
it is easily damaged by
sunlight. The skin is also
sensitive to temperature, and
it is easily damaged by
extreme temperatures.
